For the attention of Mr M Macdonald

Dear Mick

I thought I would take this opportunity to drop you a line regarding your teams effort in installing and assisting in commissioning of the change to an existing control system on our number G5 Vacuum pan.

Considering the condensed time to carry out the work, completion was achieved on time, despite many obstacles.

Much of the reason for the success of the job maybe attributed to the attitude effort and dedication of your team.

They are a credit to your company, and deserve a pat-on-the-back. I personally hope to continue this successful working relationship on future projects.

Yours sincerely
